Work Experience

Data Analyst - Accenture   (August 2022 - December 2023)

State of Missouri

- Created and implemented change management strategies and plans that optimized adoption and minimized resistance during the transition to the Oracle Cloud Platform.

Generative AI Writer (Google)

- Conducted Quality Assurance (QA) and Quality Control (QC) activities for our in-house developed LLM (Bard/Gemini).
- Reviewed and wrote over 1200 prompts to ensure accuracy and functionality which covered essays, stories, movie scripts, food recipes, etc.
- Participated in regular review sessions with my peers and provided them with feedback on their prompts and responses.
- Participated in daily team stand-ups to acquire new writing guidelines and discuss project progress.
- Worked with product teams to assess and refine the creation of prompts, ensuring alignment with project goals and customer needs.

Microsoft Power Automate

- Used Microsoft Power Automate to develop an automated workflow that synced an organization's directory with a mentorship availability survey. This saved ~50 people on average 10 minutes a week each.
- Helped users perform data manipulations and transformations within workflows, including filtering, sorting, and applying various operations on data.

Education

Hamline University, Saint Paul, MN | (B.S. in Computational Data Science) | (Chinese minor)
